CARING FOR YOUR NEW HAIR

Your new hair will be radiant, healthy and luxurious. The best way to get the longest life out of your new virgin hair extensions is to take good care of the hair only use recommended top branded products.

STYLING

When caring for your new extensions it shouldn't be too different from caring for your own hair. Although unlike your own hair, hair extensions cannot produce any oils, which moisturize the hair naturally so they can become a little dry from time to time. To counteract this we recommend that you apply a little hair serum to the hair once a day or once every other day. A tiny amount is all that is needed. Do not over grease the hair with serum.

Style with care! Do not brush too harshly we recommend that you Start at the ends of your hair and gently work your way up. Take your time!

Important: Avoid cutting the weft where possible as this can cause tangling and shredding.

When going to sleep, you should braid your hair or wrap it up gently to avoid tangling. This can also be done if you are doing anything energetic that will cause the hair to tangle. Any hot styling tools can be used on any of our hair collection to straighten or curl the hair. We do highly recommend making a small investment in bendy rollers as they are harmless to the hair and produce great casual to full glam curls.

Recommended Products: Khairmax Argan Oil Serum, John Frieda Hair Serum, Tresseme Liquid Gold, brush with soft bristles , wide tooth combs and bendy rollers.

CLIP-IN EXTENSIONS

Clip ins are great for those wanting a temporary, quick and inexpensive fix for a special occasion. Khairmax offer clip-ins for your new beautiful hair extensions, glamorizing your appearance in only a few minutes.

With clip ins, you can add length and volume to your hair quickly and easily. With absolutely no risk of damaging your own hair. It's a simple do it yourself technique that anyone can do at home.

Attaching clip-ins onto your hair extensions

Decide where you want to sew the clip in. Use a needle and thread, stitch clips using the holes on the tops and side of the clips. Sew it all the way through and tie a knot to secure it.

Attaching clip-in extensions onto your hair

Use your finger or a comb to part your hair from your right temple to your left temple, sectioning off the top part of your hair and securing it with a hair tie or hair clip.

*If your hair is very thin, use a comb to gently tease the lower half of your hair in one-inch sections. This will help keep the extensions securely in place.

Open the clips on your extensions and align the tops of the hair extensions with the horizontal part you have made and gently push down to snap the clips into place.

*If you are using multiple clip-ons, then attach them one-by-one, making sure that you evenly distribute them along the part in your hair. Release and gently blend your natural hair with the clip-on extensions.

INSTALLING YOUR TOP CLOSURE

Use a horizontal braid pattern, enabling the closure to be installed as flat as possible. Attach your weft hair as desired. It is important to ensure that the closure is installed before reaching the area of the head where the closure will be applied; so that enough space is for the closure provided.

Attach the closure by simultaneously sewing down both sides.

Carefully cut off the excessive lace as close to the hair line as possible.

Apply adhesive to the area where the closure is to be glued down. Be sure to clean the area before any adhesive is applied. Glue/Tape application can be avoided if the closure is applied accurately.
