

During Your Session

Just relax and have fun. I will give you tons of ideas and directions throughout your session to help you feel at ease. I find the best photos to be the candid photos because that is when you are at your most relaxed state.

Senior sessions typically take about 2 to 3 hours with as many outfit changes as we can fit into the session! You may be nervous at first, but don't worry - you'll soon relax and find your inner model. Note that most locations do not have facilities for changing clothes, so plan on changing clothes in your car, or wear clothing like bike shorts and a tank top under your outfits. You must arrange your own transportation to the session and between locations, if applicable. Parents (especially mom) are welcome to join us - and even jump in for some quick photos.

After Your Session

Your viewing & proofing gallery will be ready to view no later than 2 weeks following your session. We will pick a time to meet, and I will walk you through all the collections and a la carte options to find out what will best suit your needs, and I will also show you all the beautiful heirloom products that are available for you so you can pick out what you love!

Once you make your selections I will then do a full edit on your final images. I only release fully edited images. These images have been retouched, prepped, primed and ready for the world to see. After all that is what brought you to my images in the first place.

Once your order has been placed, your beautiful package will arrive within 3-4 weeks!
