Dear Chris:

Thank you for the work your company performed. National Utility Review enabled our company to decrease utility operating costs while committing a minimal amount of our time. The audit engagement was simple and easy for us as a new client, given that National Utility Review conducted the audit by performing all of the work independently and off-site. I appreciated your company's focused, specialized review and evaluation of our utility invoices along with your commitment to ensure we have a better understanding of these expenses. Your simplified recommendations and guidance allowed us to make elections with our vendors that will benefit our company for years to come.

Sincerely,

Katie Pritchard
